## For Research Use Only

## ACTL6A Polyclonal antibody Catalog Number: 10341-1-AP Featured Product 9 F

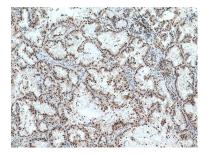

Featured Product 9 Publications

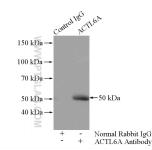

Basic Information	Catalog Number: 10341-1-AP	GenBank Accession Number: BC001391	Purification Method: Antigen affinity purification
	Size:	GenelD (NCBI):	Recommended Dilutions:
	350 µg/ml	86	WB 1:2000-1:16000
	Source: Rabbit	UNIPROT ID:	IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate
	Isotype:	096019 Full Name:	IHC 1:50-1:500
	lgG	actin-like 6A	
	Immunogen Catalog Number: AG0323	Calculated MW: 47 kDa	
		Observed MW: 45-51 kDa	
Applications	Tested Applications:	Positive	Controls:
	WB, IP, IHC, ELISA	WB : Hel	a cells, K-562 cells, MCF-7 cells
	Cited Applications: WB, IHC, IF	IP : HeLa	cells,
	Species Specificity: human, mouse, rat	IHC : hu tissue	nan lung cancer tissue, human skin cancer
	Cited Species:		
	human, mouse		
		atively, antigen	
Background Information	human, mouse Note-IHC: suggested antige TE buffer pH 9.0; (*) Altern retrieval may be performed buffer pH 6.0 Actin-like 6A (ACTL6A, synonyms which share significant amino act fold, which is an ATP-binding clef including vesicular transport, spir subunit protein of the BAF (BRG1/ SWI/SNF complex in S. cerevisiae specific genes by antagonizing ch	atively, antigen d with citrate s: ACTL6, BAF53A, MGC5382) is a fam id sequence identity to conventional ft, as a common feature. The ARPs are able orientation, nuclear migration a brm-associated factor) complex in m e and Drosophila; the latter is though promatin-mediated transcriptional re	actins. Both actins and ARPs have an actin e involved in diverse cellular processes, nd chromatin remodeling. ACTL6A is a 53 k nammals, which is functionally related to t to facilitate transcriptional activation of pression. Together with beta-actin, it is
	human, mouse Note-IHC: suggested antige TE buffer pH 9.0; (*) Altern retrieval may be performed buffer pH 6.0 Actin-like 6A (ACTL6A, synonyms which share significant amino act fold, which is an ATP-binding clef including vesicular transport, spir subunit protein of the BAF (BRG1/ SWI/SNF complex in S. cerevisiae specific genes by antagonizing ch	atively, antigen d with citrate s: ACTL6, BAF53A, MGC5382) is a fam id sequence identity to conventional ft, as a common feature. The ARPs are able orientation, nuclear migration a brm-associated factor) complex in m e and Drosophila; the latter is though promatin-mediated transcriptional re	e involved in diverse cellular processes, nd chromatin remodeling. ACTL6A is a 53 k nammals, which is functionally related to t to facilitate transcriptional activation of pression. Together with beta-actin, it is of the BAF complex with chromatin/matrix
	human, mouse Note-IHC: suggested antige TE buffer pH 9.0; (*) Altern retrieval may be performed buffer pH 6.0 Actin-like 6A (ACTL6A, synonyms which share significant amino aci fold, which is an ATP-binding clef including vesicular transport, spir subunit protein of the BAF (BRG1/ SWI/SNF complex in S. cerevisiae specific genes by antagonizing ch required for maximal ATPase acti	atively, antigen d with citrate s: ACTL6, BAF53A, MGC5382) is a fam id sequence identity to conventional ft, as a common feature. The ARPs are adle orientation, nuclear migration a brm-associated factor) complex in m e and Drosophila; the latter is though promatin-mediated transcriptional re ivity of BRG1, and for the association	actins. Both actins and ARPs have an actin e involved in diverse cellular processes, nd chromatin remodeling. ACTL6A is a 53 k nammals, which is functionally related to t to facilitate transcriptional activation of pression. Together with beta-actin, it is
Background Information	human, mouse Note-IHC: suggested antiger TE buffer pH 9.0; (*) Altern retrieval may be performed buffer pH 6.0 Actin-like 6A (ACTL6A, synonyms which share significant amino act fold, which is an ATP-binding clef including vesicular transport, spir subunit protein of the BAF (BRG1/ SWI/SNF complex in S. cerevisiae specific genes by antagonizing ch required for maximal ATPase act Author Xing Wang	atively, antigen d with citrate s: ACTL6, BAF53A, MGC5382) is a fam id sequence identity to conventional it, as a common feature. The ARPs are ndle orientation, nuclear migration a brm-associated factor) complex in m e and Drosophila; the latter is though rromatin-mediated transcriptional re ivity of BRG1, and for the association Pubmed ID Journal	actins. Both actins and ARPs have an actin involved in diverse cellular processes, nd chromatin remodeling. ACTL6A is a 53 k nammals, which is functionally related to t to facilitate transcriptional activation of pression. Together with beta-actin, it is of the BAF complex with chromatin/matrix Application

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

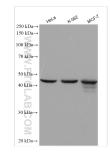

## Selected Validation Data

Immunohistochemical analysis of paraffinembedded human lung cancer tissue slide using 10341-1-AP (ACTL6A antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-ACTL6A (IP:10341-1-AP, 4ug; Detection:10341-1-AP 1:500) with HeLa cells lysate 1200ug.

Various lysates were subjected to SDS PAGE followed by western blot with 10341-1-AP (ACTL6A antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours.
