Caspase 9/P35/P10 Monoclonal antibody Catalog Number:66169-1-lg

114 Publications

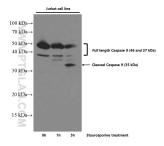

| Basic Information | Catalog Number: 66169-1-lg | GenBank Accession Number: BC002452 | Purification Method: Protein A purification | |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | Concentration: 2700 ug/ml | GeneID (NCBI): 842 | CloneNo.: 1B7G2 | |
| | Source: Mouse | UNIPROT ID: P55211 | Recommended Dilutions: WB 1:500-1:2000 | |
| | Isotype: IgG2b Immunogen Catalog Number: AG20813 | Full Name: caspase 9, apoptosis-related cystein peptidase Calculated MW: 46 kDa Observed MW: 46 kDa, 35 kDa | IP 0.5-4.0 ug for 1.0-3.0 mg of total e protein lysate IHC 1:100-1:400 IF/ICC 1:50-1:500 | |
| Applications | Tested Applications: | Positive Con | ntrols: | |
| | WB, IHC, IF/ICC, IP, ELISA | WB : HeLa cells, Jurkat cells | | |
| | Cited Applications: WB, IHC, IF, ELISA | IP : HeLa cell | ls, | |
| | Species Specificity: | IHC : human | lymphoma tissue, human pancreas tissue | |
| | human, mouse | IF/ICC : HeLa | cells, | |
| | Cited Species: human, mouse, rat, pig, sheep | | | |
| | Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0 | | | |
| | | | | |
| Background Information | a member of the cysteine-aspartic role in the execution-phase of cell processing at conserved aspartic r enzyme. Capase 9 is processed by activation cascade. In recent years distribution, a very extensive loca | eine protease (CASP9, synonyms: MCH6, / c acid protease (caspase) family. Sequent l apoptosis. Caspases exist as inactive pr esidues to produce 2 subunits, large and caspase APAF1; this step is thought to be s, the localization of caspase9 was a focu llization study was done on rat brain tiss to a lesser extend in the cytoplasm [PMI | ial activation of caspases plays a central oenzymes which undergo proteolytic small, that dimerize to form the active e one of the earliest in the caspase s of interest. Beside its cytoplasmic ue, where caspase9 was found located | |
| | a member of the cysteine-aspartic role in the execution-phase of cell processing at conserved aspartic r enzyme. Capase 9 is processed by activation cascade. In recent year distribution, a very extensive loca predominantly in the nucleus and | acid protease (caspase) family. Sequent l apoptosis. Caspases exist as inactive pr esidues to produce 2 subunits, large and caspase APAF 1; this step is thought to be s, the localization of caspase9 was a focu lization study was done on rat brain tiss to a lesser extend in the cytoplasm [PMI | ial activation of caspases plays a central oenzymes which undergo proteolytic small, that dimerize to form the active e one of the earliest in the caspase s of interest. Beside its cytoplasmic ue, where caspase9 was found located D: 15541731]. | |

| Background Information | a member of the cysteine-aspartic role in the execution-phase of cell processing at conserved aspartic r enzyme. Capase 9 is processed by activation cascade. In recent year distribution, a very extensive loca predominantly in the nucleus and Author I Dan Mo | cacid protease (caspase) family. Sequent lapoptosis. Caspases exist as inactive pr esidues to produce 2 subunits, large and caspase APAF1; this step is thought to be s, the localization of caspase9 was a focu- lization study was done on rat brain tiss to a lesser extend in the cytoplasm [PMI Pubmed ID Journal 31568784 Eur J Pharmacol | ial activation of caspases plays a central oenzymes which undergo proteolytic small, that dimerize to form the active e one of the earliest in the caspase s of interest. Beside its cytoplasmic ue, where caspase9 was found located D: 15541731]. Application WB | |
| | a member of the cysteine-aspartic role in the execution-phase of cell processing at conserved aspartic r enzyme. Capase 9 is processed by activation cascade. In recent year distribution, a very extensive loca predominantly in the nucleus and Author I Dan Mo I Na Jiang | acid protease (caspase) family. Sequent l apoptosis. Caspases exist as inactive pr esidues to produce 2 subunits, large and caspase APAF 1; this step is thought to be s, the localization of caspase9 was a focu- lization study was done on rat brain tiss to a lesser extend in the cytoplasm [PMI Pubmed ID Journal | ial activation of caspases plays a central oenzymes which undergo proteolytic small, that dimerize to form the active e one of the earliest in the caspase s of interest. Beside its cytoplasmic ue, where caspase9 was found located D: 15541731]. Application | |

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

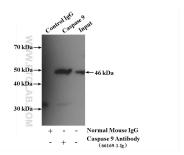

temperature for 1.5 hours.

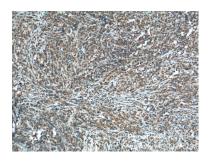

Untreated and Staurosporine treated Jurkat cells were subjected to SDS PAGE followed by western blot with 66169-1-1g (Caspase 9/P35/P10 antibody) at dilution of 1:5000 incubated at room

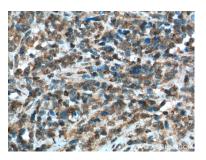

HeLa cells were subjected to SDS PAGE followed by western blot with 66169-1-lg (Caspase 9/P35/P10 antibody at dilution of 1:1000 incubated at room temperature for 1.5 hours.

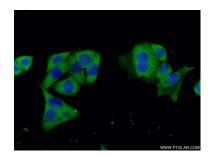

IP result of anti-Caspase 9/P35/P10 (IP:66169-1-Ig, 5ug; Detection:66169-1-Ig 1:500) with HeLa cells lysate 3200ug.

Immunohistochemical analysis of paraffinembedded human lymphoma tissue slide using 66169-1-1g (Caspase 9/P35/P10 antibody at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human lymphoma tissue slide using 66169-1-Ig (Caspase 9/P35/P10 antibody at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using 66169-1-1g(Caspase 9/P35/P10 antibody) at dilution of 1:100 and Alexa Fluor 488-conjugated AffiniPure Goat Anti-Mouse IgG(H+L).
