For Research Use Only

NR2E3 Monoclonal antibody

Catalog Number: 66494-1-Ig

Purification Method:

Protein G purification

Recommended Dilutions:

WB 1:500-1:2000

CloneNo.:

1G1D9

Basic Information

Catalog Number: GenBank Accession Number: 66494-1-Ig BC041421

 Isotype:
 Full Name:

 IgG1
 nuclear receptor subfamily 2, group E,

Immunogen Catalog Number: member 3
AG5831 Calculated MW:

45 kDa
Observed MW:
45-50 kDa

Applications

Tested Applications: WB,ELISA

Species Specificity: Pig, Mouse

Positive Controls:

WB: pig retina tissue, mouse retina tissue

Background Information

NR2E3, also known as PNR, encodes a retinal nuclear receptor that is a ligand-dependent transcription factor. This protein is part of a large family of nuclear receptor transcription factors involved in signaling pathways. NR2E3 influences the development of photoreceptors and their differentiation into rod and cone types, and acts as a ranscriptional factor that is an activator of rod development and repressor of cone development [PMID:20725840]. It binds the promoter region of a number of rod- and cone-specific genes, including rhodopsin, M- and S-opsin and rod-specific phosphodiesterase beta subunit. [PMID:15689355]

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

pig retina tissue were subjected to SDS PAGE followed by western blot with 66494-1-1g (NR2E3 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.
