and Storage	term storage. After reconstitution with sterile water, if glycerol has no effect	Upon receipt, store it immediately at the recommended temperature (see below).		
	on subsequent experiments, it is recommended to add an			
	equal volume of glycerol for long-term storage (see Stability			
	and Storage for more details). If a different concentration is needed for your purposes please			
	adjust the reconstitution volume as required (please note: the			
	ion concentration of the final solution will vary according to			
	the volume used).			
	Note: Centrifuge vial before opening. When reconstituting,			
	gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.			
Stability and Storage	Store for up to 12 months at -20°C to -80°C as lyophilized			
Stability and Storage	powder.			
Storage of	Short Term Storage:			
	Store at 2-8°C for (1-2 weeks).			
Reconstituted Protein	Long Term Storage:			
	Aliquot and store at -20°C to -80°C for up to 3 months,			
	reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.
