## For Research Use Only

# CoraLite® Plus 488-conjugated 6\*His, His-Tag Monoclonal antibody

Catalog Number: CL488-66005

3 Publications

**Basic Information** 

Catalog Number: CL488-66005

1000 µg/ml Source:

Mouse Isotype: IgG1 GenBank Accession Number:

GeneID (NCBI): Full Name:

Calculated MW:

1 kDa

Purification Method:

Protein G purification

CloneNo.: 1B7G5

Recommended Dilutions:

IF 1:50-1:500

Excitation/Emission maxima wavelengths:

493 nm / 522 nm

**Applications** 

**Tested Applications:** 

IF/ICC

**Cited Applications:** 

FC

Species Specificity: recombinant protein Cited Species:

human

**Positive Controls:** 

IF: Transfected HEK-293 cells,

# **Background Information**

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. His-tag is often used for affinity purification and binding assays. Expressed His-tagged proteins can be purified and detected easily because the string of histidine residues binds to several types of immobilized metal ions, including nickel, cobalt and copper, under specific buffer conditions. The His-tag antibody is a useful tool for monitoring of the His-tagged proteins, and recognizes His-tags placed at N-terminal, C-terminal, and internal regions of fusion proteins expressed in bacteria, insect, and mammalian cells.

#### **Notable Publications**

Author	Pubmed ID	Journal	Application

### Storage

Storage:

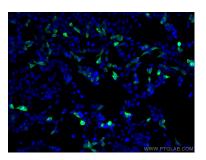

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

# Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed Transfected HEK-293 cells using the CoraLite® Plus 488-conjugated version of this antibody, CL488-66005 (6°His, His-Tag antibody), at dilution of 1:100.
