

For Research Use Only

CoraLite®594-conjugated Alpha E-Catenin Monoclonal antibody

Catalog Number:CL594-66221

Basic Information

Catalog Number:

CL594-66221

Size:

1000 µg/ml

Source:

Mouse

Isotype:

IgG1

Immunogen Catalog Number:

AG23603

GenBank Accession Number:

BC031262

GeneID (NCBI):

1495

UNIPROT ID:

P35221

Full Name:

catenin (cadherin-associated protein),
alpha 1, 102kDa

Calculated MW:

906 aa, 100 kDa

Observed MW:

95-100 kDa

Purification Method:

Protein G purification

CloneNo.:

2B7B8

Excitation/Emission maxima
wavelengths:

588 nm / 604 nm

Applications

Tested Applications:

FC (Intra)

Species Specificity:

human, mouse

Background Information

Alpha catenin is an essential component of adherens junctions that connects E-cadherin- β -catenin complexes with the actin cytoskeleton. It also recruits a range of other important proteins to developing intercellular junctions. Three alpha catenins exist in human: alpha-E-catenin, alpha-N-catenin, and alpha-T-catenin, which share substantial amino-acid sequence similarity but have distinct tissue distribution. alpha-E-catenin is ubiquitously expressed, alpha-N-catenin is restricted to neuronal tissue, and alpha-T-catenin is primarily expressed in heart tissue. Reduced levels of alpha-E-catenin protein seem to be characteristic of many different human cancers, including malignant tumours of the breast, colon, stomach, oesophagus, bladder and liver. In addition, the loss of alpha-E-catenin often correlates with the degree of tumour differentiation and metastasis.

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1×10^6 MCF-7 cells were intracellularly stained with 0.8 μ g CoraLite[®]594 Anti-Human Alpha E-Catenin (CL594-66221, Clone:2B7B8) (red), or 0.8 μ g CoraLite[®]594 Mouse IgG1 Isotype Control (MOPC-21) (CL594-65124, Clone: MOPC-21) (blue). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
