

For Research Use Only

PE Anti-Mouse CD31 (390)

Catalog Number: PE-65058

Basic Information

Catalog Number:

PE-65058

Size:

100ug, 0.1 mg/ml

Source:

Rat

Isotype:

IgG2a

GenBank Accession Number:

BC008519

GeneID (NCBI):

18613

UNIPROT ID:

Q08481

Full Name:

platelet/endothelial cell adhesion molecule 1

Purification Method:

Affinity purification

CloneNo.:

390

Excitation/Emission maxima wavelengths:

496 nm, 565 nm / 578 nm

Applications

Tested Applications:

FC

Species Specificity:

Mouse

Background Information

Platelet endothelial cell adhesion molecule-1 (PECAM-1, CD31) is a member of the immunoglobulin gene superfamily of cell adhesion molecules. CD31 is a transmembrane glycoprotein that is highly expressed on the surface of the endothelium, making up a large portion of its intracellular junctions. PECAM-1 is also present on the surface of hematopoietic cells and immune cells including platelets, monocytes, neutrophils, natural killer cells, megakaryocytes and some types of T-cell (PMID: 9011572). As well as its role in cell-cell adhesion, PECAM-1 functions as a signaling receptor, and is involved in important physiological events such as nitric oxide production, regulation of T-cell immunity and tolerance, leukocyte transendothelial migration and inflammation and angiogenesis (PMID: 21183735; 20978210; 17872453; 20634489).

Storage

Storage:

Store at 2-8°C. Avoid exposure to light.

Storage Buffer:

PBS with 0.1% sodium azide and a stabilizer.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ BALB/c mouse splenocytes were surface stained with 0.2 ug PE Anti-Mouse CD31 (PE-65058, Clone: 390) (red) or 0.2 ug PE-rat IgG2a isotype control (blue). Cells were not fixed.
