For Research Use Only

Prothymosin Alpha Polyclonal antibody

Catalog Number: 10480-1-AP

Basic Information

Catalog Number: 10480-1-AP GenBank Accession Number:

BC003510 GeneID (NCBI):

 Size:
 Genel Ε

 800 μg/ml
 5757

Source: UNIPROT ID:
Rabbit P06454
Isotype: Full Name:

IgG prothymosin, alpha Immunogen Catalog Number: Calculated MW:

AG0732 12 kDa

Purification Method: Antigen affinity purification Recommended Dilutions: IHC 1:20-1:200

Applications

Tested Applications:

IHC,ELISA

Species Specificity:

human

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate

buffer pH 6.0

Positive Controls:

IHC: human lymphoma tissue,

Background Information

Prothymosin alpha (PTMA) is a nuclear protein possessing a number of cellular functions including cell survival. PTMA is identified to be localized in the nuclei of neurons, while it is found in both nuclei and cytoplasm in the astrocytes and microglia of adult brai. PTMA inhibits the neuronal necrosis induced by serum-free starvation or ischemia-reperfusion stress, which causes a rapid internalization of GLUT1/4, leading a decrease in glucose uptake and cellular ATP levels. Extensive research on PTMA showed that it is of clinical significance and potential medical use as they may serve as a molecular marker for cancer prognosis and/or as therapeutic agents for treating immunodeficiencies, autoimmune diseases and malignancies.

Storage

Storage:

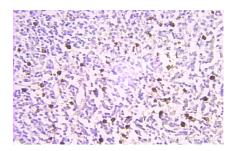

Store at -20°C. Stable for one year after shipment.

Storage Buffer

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunohistochemical analysis of paraffinembedded human lymphoma using 10480-1-AP (Prothymosin alpha antibody) at dilution of 1:100 (under 25x lens).
