Background Information

PIK3R4 (phosphoinositide 3-kinase regulatory subunit 4) is also named as PI3-kinase p150 subunit and belongs to the Ser/Thr protein kinase family. It is a regulatory subunit of the PI3K complex and may regulate membrane trafficking late in the endocytic pathway. This protein can be probably autophosphorylated (PMID:19369195).

Selected Validation Data

HepG2 cells were subjected to SDS PAGE followed by western blot with 17894-1-AP (VPS15 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of HeLa cells, using PIK3R4 antibody 17894-1-AP at 1:25 dilution and Rhodamine-labeled goat anti-rabbit IgG (red).
