ABCC5 Polyclonal antibody

Catalog Number:19503-1-AP 3 Publications

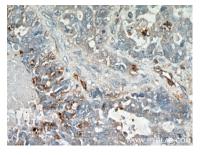

Basic Information	Catalog Number: 19503-1-AP	GenBank Accession Number: NM_005688	Purification Method: Antigen affinity purification	
	Size: 460 µg/ml	GenelD (NCBI): 10057	Recommended Dilutions: IHC 1:20-1:200	
	Source: Rabbit	UNIPROT ID: 015440		
	Isotype: IgG	Full Name: ATP-binding cassette, sub-family (CFTR/MRP), member 5	c	
		Calculated MW: 161 kDa		
Applications	Tested Applications:	Positive C	sitive Controls:	
	IHC, ELISA Cited Applications: WB, IHC	IHC : hum cancer tis	an ovary tumor tissue, human pancreas sue	
	Species Specificity: human			
	Cited Species: human			
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0			
		med with citrate		
Background Information	ABCC5, also named as MOAT and Conjugate transporter (T transport nucleotide analogs contributes to the degradatio Studies show that ABCC5 pro the anti-HIV drug 9-(2-phosp acute lymphoblastic leukem	F-C, pABC11, SMRP, and MRP5, belongs to th C 3.A.1.208) subfamily. ABCC5 acts as a m . ABCC5 functions in the cellular export of i on of phosphodiesterases and possibly an e ovides resistance to thiopurine anticancer d honylmethoxyethyl) adenine. ABCC5 may ia and antiretroviral nucleoside analogs in nolecular weight of ABCC5 could be variabl	ultispecific organic anion pump that can its substrate, cyclic nucleotides. This export limination pathway for cyclic nucleotides. Irugs, 6-mercatopurine and thioguanine, and be involved in resistance to thiopurines in HIV-infected patients. Since it is
