AGRN Polyclonal antibody

Catalog Number: 20692-1-AP

Basic Information

Catalog Number: 20692-1-AP	GenBank Accession Number: NM_198576	Purification Method: Antigen affinity purification
Size: 900 µg/ml	GeneID (NCBI): 375790	Recommended Dilutions: WB 1:500-1:1000 IF/ICC 1:50-1:500
Source: Rabbit	UNIPROT ID: O00468	
Isotype: IgG	Full Name: agrin	
	Calculated MW: 215 kDa	
	Observed MW: 225 kDa, 97 kDa	

Applications

Tested Applications: WB, IF/ICC, ELISA	Positive Controls: WB : DU 145 cells, IF/ICC : Saos-2 cells,
Species Specificity: human	

Background Information

Agrin, a large heparan sulfate proteoglycan, is expressed in neuronal, as well as nonneuronal tissues (PMID:12671652). Nerve-derived agrin has been demonstrated to play an essential role in development and maintenance of the neuromuscular junction (PMID:16386415). The agrin gene encodes a protein of more than 2000 amino acids with predicted molecular weight of 225 kDa but can display as 600 kDa protein due to extensive N-terminal glycosylation (PMID:12671652). Neurotrypsin cleaves the proteoglycan agrin at two homologous, highly conserved sites, liberating a middle 90-kDa and a C-terminal 22-kDa fragment from the membrane or ECM-bound N-terminal moiety of agrin (PMID:18230682).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 20692-1-AP (AGRN antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Methanol) fixed Saos-2 cells using AGRN antibody (20692-1-AP) at dilution of 1:200 and CoraLite® 488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
