Background Information

ZFPM1 (Zinc Finger Protein, FOG Family Member 1, previous known as FOG1) is a protein with nine zinc finger domains, the C2HC type zinc fingers on ZFPM1 protein are responsible for mediating the interaction with the N-finger of GATA factors (PMID:10329627). ZFPM1 also contains two domains that are known to recruit transcriptional regulatory complexes. The one located at the extreme N-terminus is essential to recruit the nucleosome remodeling and histone deacetylase (NuRD) complex, another one between zinc fingers 6 and 7 could bind to CtBP co-repressor (PMID:30611731).
