### For Research Use Only

# FLNC Polyclonal antibody, PBS Only

Catalog Number: 28492-1-PBS

**Basic Information** 

Catalog Number:

GenBank Accession Number:

**Purification Method:** 

Antigen affinity purification

28492-1-PBS

NM\_001458 GeneID (NCBI):

Size: 1 mg/ml

2318

Source:

**UNIPROT ID:** Q14315

Rabbit Isotype:

Full Name: filamin C, gamma (actin binding

Immunogen Catalog Number:

protein 280) Calculated MW:

AG29328

291 kDa Observed MW:

280-300 kDa

**Applications** 

**Tested Applications:** 

WB, IHC, Indirect ELISA

Species Specificity:

## **Background Information**

Filamin C (FLNC; also known as  $\gamma$  -FLN; ABP-L; FLN2), a muscle-specific filamin and a large actin-cross-linking  $protein.\ Human\ filamins\ are\ {\it ``280\ kDa}\ homodimers, each monomer\ consisting\ of\ an\ N-terminal\ actin-binding$ domain followed by 24 immunoglobulin (Ig)-like domains (d1 to d24), the last of which mediates dimerization. FLNC is specifically expressed in cardiomyocytes and skeletal myocytes and is involved in the maintenance of structural integrity. High filamin C associated with better prognosis of prostate cancer, leukemia and breast cancer patients. (PMID: 25577646, PMID: 30867563, PMID: 31131323)

## Storage

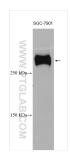

Storage:

Store at -80°C.

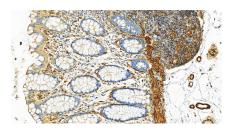

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer: PBS Only

### **Selected Validation Data**

SGC-7901 cells were subjected to SDS PAGE followed by western blot with 28492-1-AP (filaminc antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 28492-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded human colon slide using 28492-1-AP (FLNC antibody) at dilution of 1:200 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 28492-1-PBS in a different storage buffer formulation.
