

ASCL1 Polyclonal antibody

Catalog Number: **31206-1-AP**

Basic Information

Catalog Number:

31206-1-AP

Size:

450 µg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG35185

GenBank Accession Number:

BC003134

GeneID (NCBI):

429

UNIPROT ID:

P50553

Full Name:achaete-scute complex homolog 1
(Drosophila)**Calculated MW:**

25 kDa

Observed MW:

25 kDa

Purification Method:

Antigen affinity Purification

Recommended Dilutions:

WB 1:2000-1:10000

Applications

Tested Applications:

WB, ELISA

Species Specificity:

Human

Positive Controls:

WB : K-562 cells, NCI-H1299 cells, U-251 cells, PC-3 cells

Background Information

ASCL1 (achaete-scute family bHLH transcription factor 1), also known as ASH1. It is expected to be located in nucleus. Transcription factor that plays a key role in neuronal differentiation: acts as a pioneer transcription factor, accessing closed chromatin to allow other factors to bind and activate neural pathways. Plays a role at early stages of development of specific neural lineages in most regions of the CNS, and of several lineages in the PNS. Essential for the generation of olfactory and autonomic neurons. Acts synergistically with FOXN4 to specify the identity of V2b neurons rather than V2a from bipotential p2 progenitors during spinal cord neurogenesis, probably through DLL4-NOTCH signaling activation. Involved in the regulation of neuroendocrine cell development in the glandular stomach. The calculated molecular weight of ASCL1 is 25 kDa.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 31206-1-AP (ASCL1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.
