For Research Use Only

Anti-Human CD73 (AD2) Rabbit Recombinant Antibody, PBS only

Purification Method:

Affinity purification

CloneNo.:

AD2

Catalog Number: 65500-1-PBS

Basic Information

Catalog Number:

65500-1-PBS

Size:

1mg, 1 mg/mL Source:

Rabbit

Isotype:

GenBank Accession Number: BC015940

GeneID (NCBI):

4907 Full Name:

5'-nucleotidase, ecto (CD73)

Calculated MW: 29 kDa, 63 kDa

Applications

Tested Applications:

Species Specificity:

Human

Background Information

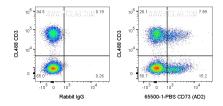

CD73, also known as ecto-5'-nucleotidase (5'-NT), is a 70-kDa, glycosyl-phosphatidylinositol-linked membranebound glycoprotein found in most tissues (PMID: 18404475; 20179192). CD73 is an ectoenzyme that catalyzes the dephosphorylation of AMP and other nucleoside monophosphates (PMID: 9553767). In the human immune system, CD73 is expressed on subsets of T and B cells, on germinal center follicular dendritic cells, and on thymic medullary reticular fibroblasts and epithelial cells (PMID: 2137649; 9553767). CD73 is highly expressed in many human solid tumors and is closely involved in cancer progression (PMID: 20179192).

Storage

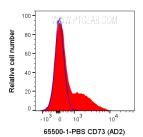

Store at -80°C. Stable for one year after shipment.

Storage Buffer: PBS only

Selected Validation Data

1X10^6 human PBMCs were surface stained with CL488 Anti-Human CD3 and 0.4 ug Anti-Human CD73 Rabbit Recombinant Antibody (65500-1-PBS, Clone:AD2) labeled with FlexAble CL750 Antibody Labeling Kit for Rabbit IgG (KFA004), or Rabbit IgG control labeled with FlexAble CL750 Antibody Labeling Kit for Rabbit IgG (KFA004). Cells were not fixed. Lymphocytes were gated.
