For Research Use Only

## HBE1-Specific Monoclonal antibody, PBS Only

Catalog Number: 66151-1-PBS

Basic Information Cat

Catalog Number: 66151-1-PBS

Size: 1 mg/ml Source:

Isotype: IgG1

Mouse

GenBank Accession Number:

NM\_005330 GeneID (NCBI): 3046 UNIPROT ID: P02100 Full Name:

hemoglobin, epsilon 1

Observed MW: 16 kDa Purification Method: Protein G purification

CloneNo.: 2C11G6

**Applications** 

Tested Applications: WB, IHC, Indirect ELISA Species Specificity: human

**Background Information** 

The hemoglobin molecule is a tetramer consisting of two  $\,^{\alpha}$  -globin-like polypeptide chains and two  $\,^{\beta}$  -globin-like chains. The human hemoglobin genes are expressed in a tightly developmentally controlled fashion.  $\,^{\epsilon}$  -globin (HBE1) is the predominantly expressed gene during the embryonic stage. The epsilon hemoglobin chain seems to be the best marker for fetal nucleated red blood cells (NRBCs). Anti-HBE1 may be used to label and isolate fetal cells from maternal blood and can be useful in prenatal diagnosis. This antibody specifically recognizes the HBE1 and doesn't cross-react with other globin chains.

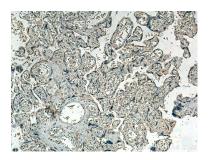

Storage

Storage: Store at -80°C. Storage Buffer: PBS Only

## **Selected Validation Data**

K-562 cells were subjected to SDS PAGE followed by western blot with 66151-1-1g (HBE1-Specific antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66151-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded human placenta tissue slide using 66151-1-Ig (HBE1-Specific antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 66151-1-PBS in a different storage buffer formulation.
