

For Research Use Only

NR2E3 Monoclonal antibody, PBS Only

Catalog Number: 66494-1-PBS

Basic Information

Catalog Number: 66494-1-PBS	GenBank Accession Number: BC041421	Purification Method: Protein G purification
Size: 1 mg/ml	GeneID (NCBI): 10002	CloneNo.: 1G1D9
Source: Mouse	UNIPROT ID: Q9Y5X4	
Isotype: IgG1	Full Name: nuclear receptor subfamily 2, group E, member 3	
Immunogen Catalog Number: AG5831	Calculated MW: 45 kDa	
	Observed MW: 45-50 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
Pig, Mouse

Background Information

NR2E3, also known as PNR, encodes a retinal nuclear receptor that is a ligand-dependent transcription factor. This protein is part of a large family of nuclear receptor transcription factors involved in signaling pathways. NR2E3 influences the development of photoreceptors and their differentiation into rod and cone types, and acts as a transcriptional factor that is an activator of rod development and repressor of cone development [PMID:20725840]. It binds the promoter region of a number of rod- and cone-specific genes, including rhodopsin, M- and S-opsin and rod-specific phosphodiesterase beta subunit. [PMID:15689355]

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

pig retina tissue were subjected to SDS PAGE followed by western blot with 66494-1-Ig (NR2E3 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66494-1-PBS in a different storage buffer formulation.
