

For Research Use Only

# ANLN Monoclonal antibody, PBS Only

Catalog Number: 66643-1-PBS

Featured Product

## Basic Information

<b>Catalog Number:</b> 66643-1-PBS	<b>GenBank Accession Number:</b> BC034692	<b>Purification Method:</b> Protein G purification
<b>Size:</b> 1 mg/ml	<b>GeneID (NCBI):</b> 54443	<b>CloneNo.:</b> 1B4A8
<b>Source:</b> Mouse	<b>UNIPROT ID:</b> Q9NQW6	
<b>Isotype:</b> IgG1	<b>Full Name:</b> anillin, actin binding protein	
<b>Immunogen Catalog Number:</b> AG19294	<b>Calculated MW:</b> 1124 aa, 124 kDa	
	<b>Observed MW:</b> 110 kDa~120 kDa	

## Applications

**Tested Applications:**  
WB, ELISA

**Species Specificity:**  
Human, Mouse, Rat

## Background Information

Anillin, an actin-binding protein, is a conserved cleavage furrow component important for cytokinesis. The human anillin protein localizes to the nucleus during interphase, the cortex following nuclear envelope breakdown, and the cleavage furrow during cytokinesis. It interacts with at least two other furrow proteins, actin and the septins through its C-terminal PH domain and N-terminal actin-binding domain. In anillin knockdown cells, the cleavage furrow ingressed but failed to complete the ingression. Anillin has been found to be overexpressed in tumors and may serve as promising marker for pancreatic carcinoma molecular diagnostics as well as a prognostic indicator for non-small cell lung cancers.

## Storage

**Storage:**  
Store at -80°C.  
**The product is shipped with ice packs. Upon receipt, store it immediately at -80°C**

**Storage Buffer:**  
PBS only

**This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.**

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 66643-1-Ig (ANLN antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66643-1-PBS in a different storage buffer formulation.

WB result of ANLN antibody (66643-1-Ig: 1:3000; incubated at room temperature for 1.5 hours) with sh-Control and sh-ANLN transfected MCF-7 cells. This data was developed using the same antibody clone with 66643-1-PBS in a different storage buffer formulation.
