

For Research Use Only

CYLD Monoclonal antibody, PBS Only

Catalog Number: 66858-1-PBS

Basic Information

Catalog Number: 66858-1-PBS	GenBank Accession Number: BC012342	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 1540	CloneNo.: 1G2F4
Source: Mouse	UNIPROT ID: Q9NQC7	
Isotype: IgG2a	Full Name: cylindromatosis (turban tumor syndrome)	
Immunogen Catalog Number: AG28333	Calculated MW: 107 kDa	
	Observed MW: 110 kDa	

Applications

Tested Applications:
WB, Indirect ELISA, IF

Species Specificity:
Human, mouse, rat, pig, rabbit

Background Information

CYLD, also named as CYLD1, belongs to the peptidase C67 family. It is the protease that specifically cleaves 'Lys-63'-linked polyubiquitin chains. CYLD has endodeubiquitinase activity and plays an important role in the regulation of pathways leading to NF-kappa-B activation. CYLD contributes to the regulation of cell survival, proliferation and differentiation via its effects on NF-kappa-B activation. It is a negative regulator of Wnt signaling. CYLD inhibits HDAC6 and thereby promotes acetylation of alpha-tubulin and stabilization of microtubules. CYLD plays a role in the regulation of microtubule dynamics, and thereby contributes to the regulation of cell proliferation, cell polarization, cell migration, and angiogenesis. It is required for normal cell cycle progress and normal cytokinesis. CYLD inhibits nuclear translocation of NF-kappa-B and plays a role in the regulation of inflammation and the innate immune response, via its effects on NF-kappa-B activation. It is dispensable for the maturation of intrathymic natural killer cells, but required for the continued survival of immature natural killer cells. CYLD negatively regulates TNFRSF11A signaling and osteoclastogenesis.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 66858-1-Ig (CYLD antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated Alpha Tubulin Monoclonal antibody (HRP-66031) as loading control. This data was developed using the same antibody clone with 66858-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed SH-SY5Y cells using CYLD antibody (66858-1-Ig, Clone: 1G2F4) at dilution of 1:100 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). This data was developed using the same antibody clone with 66858-1-PBS in a different storage buffer formulation.

Various lysates were subjected to SDS PAGE followed by western blot with 66858-1-Ig (CYLD antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66858-1-PBS in a different storage buffer formulation.
