## Background Information

CRMP1 (Collapsin response mediator protein 1) is also named as DPYSL1, ULIP3, DRP-1 and belongs to the collapsin response mediator protein family, which are a family of five cytoplasmic proteins predominantly expressed in the developing nervous system. CRMP1, the predicted 62 kDa protein and its 74 kDa isoform corresponding to its N-terminal splice variant already described for embryonic, neonatal, and adult brain of the rat are evidenced in the cortex of adult mouse (PMID:15834957). This protein is involved in invasion, and aggressiveness of prolactin pituitary tumors.

## Selected Validation Data

mouse cerebellum tissue were subjected to SDS PAGE followed by western blot with 68021-1-Ig (CRMP1 antibody) at dilution of 1:25000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68021-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded mouse brain tissue slide using 68021-1-Ig (CRMP1 antibody) at dilution of 1:10000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 68021-1-PBS in a different storage buffer formulation.
