

For Research Use Only

Protein Z Monoclonal antibody, PBS Only

Catalog Number: 68394-1-PBS

Basic Information

Catalog Number: 68394-1-PBS	GenBank Accession Number: BC074906	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 8858	CloneNo.: 2A1D3
Source: Mouse	UNIPROT ID: P22891	
Isotype: IgG2a	Full Name: protein Z, vitamin K-dependent plasma glycoprotein	
Immunogen Catalog Number: AG13051	Calculated MW: 400 aa, 45 kDa	
	Observed MW: 45-47 kDa, 27 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
Human

Background Information

Protein Z (PZ, PROZ) is a vitamin K-dependent plasma protein that serves as a cofactor for activated factor X inhibition by the PZ-dependent protease inhibitor (PMID: 16938126). Reduced circulating levels of PZ have been suggested to play a role in the occurrence of bleeding (PMID: 7495103) and deep vein thrombosis (DVT) (PMID: 10829076), as well as in unexplained abortions with early fetal loss (PMID: 11895801), late fetal demise and intrauterine growth restriction (PMID: 16260213), acute coronary syndromes (PMID: 14652653), and stroke (PMID: 11570404). In addition, PZ may be a biomarker for the early diagnosis of pancreatic cancer (PMID: 31025496). It has two isoforms with molecular weights of 44 kDa and 47 kDa.

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

For technical support and original validation data for this product please contact:

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68394-1-Ig (Protein Z antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68394-1-PBS in a different storage buffer formulation.
