For Research Use Only

G3BP2 Monoclonal antibody, PBS Only

Purification Method:

CloneNo.:

2E5G3

Protein G purification

Catalog Number: 68580-1-PBS

Basic Information

Catalog Number: 68580-1-PBS

Size: 1 mg/ml Source: Mouse Isotype: lgG1

Immunogen Catalog Number:

AG9222

Calculated MW:

482aa,54 kDa; 449aa,51 kDa

GenBank Accession Number:

GTPase activating protein (SH3 domain) binding protein 2

Observed MW: 54 kDa

BC011731

9908

GeneID (NCBI):

UNIPROT ID:

Q9UN86

Full Name:

Applications

Tested Applications: WB,Indirect ELISA,IF Species Specificity: Human, rat

Background Information

Stress granules (SGs) are cytoplasmic mRNA-protein condensates formed in response to cellular stressors, such as oxidative stress, ultraviolet radiation, and viral infection (1). The Ras-GTPase-activating protein-binding proteins (G3BPs), consisting of G3BP1 and G3BP2, are key nucleating factors essential for SG formation. They function to protect RNAs from harmful conditions. G3BP2 is mainly distributed in the cytoplasm and participates in the formation of stress granules, cell differentiation, proliferation, and signal transduction. Accumulating evidence has demonstrated that aberrant expression of G3BP2 contributes to cancer initiation and progression, such as high expression of G3BP2 increasing cell stemness, metastasis and chemoresistance in breast cancer.

Storage

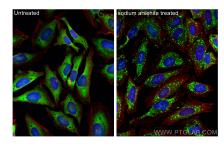

T: 4006900926

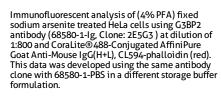

Storage: Store at -80°C. Storage Buffer: PBS Only

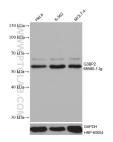

E: Proteintech-CN@ptglab.com

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68580-1-lg (G3BP2 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control. This data was developed using the same antibody clone with 68580-1-PBS in a different storage buffer formulation.
