For Research Use Only

## NeutraControl IFN-gamma Monoclonal antibody, PBS Only

Catalog Number: 69507-1-PBS

**Basic Information** 

Catalog Number: 69507-1-PBS

Concentration:

1 mg/ml Source: Mouse

Isotype: IgG1

Immunogen Catalog Number:

HZ-1301

GenBank Accession Number:

GeneID (NCBI):

3458

ENSEMBL Gene ID: ENSG00000111537

Full Name: IFN gamma Protein G purification CloneNo.:

2F11G6

**Purification Method:** 

**Applications** 

Tested Applications: ELISA, Non-Neutralization Species Specificity:

human

**Background Information** 

Interferon gamma (IFNG) is a soluble cytokine that is the only member of the type II class of interferons. It is secreted by Th1 cells, cytotoxic T cells and NK cells. The cytokine is associated with antiviral, immunoregulatory and anti-tumor properties and is a potent activator of macrophages. It plays crucial roles in pathogen clearance. Aberrant IFNG expression is associated with a number of autoinflammatory and autoimmune diseases. It has been identified in many studies as a biomarker for pleural tuberculosis (TB). Mutations in this gene are associated with aplastic anemia.

This antibody is a neutralizing control antibody for IFN gamma, the immunogen is the same as Neutrakine 69007-1-Ig but could not neutralize human IFN gamma.

Storage

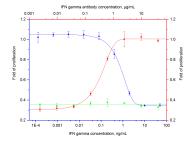

Storage:

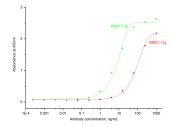

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C Storage Buffer:

PBS Only, pH7.4

## **Selected Validation Data**

Recombinant human IFN-gamma (Cat.NO. HZ-1301) inhibits HT-29 cell line (human colorectal adenocarcinoma cell line) proliferation in the prescence of 0.5 ng/mL TNF alpha in a dose-dependent manner (blue curve, refer to bottom X-left Y axis). The activity of human IFN-gamma (5 ng/mL HZ-1301 axis) is neutralized by mouse antihuman IFN-gamma monoclonal antibody 69007-1-lg at serial dose (red curve, refer to top X-right Y axis). The ND50 is typically 100-

Indirect ELISA was carried out by coating recombinant Human IFN gamma (Cat.NO. HZ-1301) at 70 ng/well followed by blocking and adding serial diluted IFN gamma antibody 69007-1-lg and 69507-1-lg respectively. Signal was developed with TMB and stopped by H2SO4. Signal strength was measured by absorbance at 450 nm. This data was developed using the same antibody clone with 69507-1-PBS in a different storage buffer formulation.
