For Research Use Only

NR1H4 Recombinant antibody, PBS Only

Purification Method:

Protein A purification

CloneNo.:

4B4

Catalog Number:81820-2-PBS

Basic Information

Catalog Number: GenBank Accession Number: 81820-2-PBS BC130573

BC130573 GeneID (NCBI):

1mg/ml9971Source:UNIPROT ID:RabbitQ96Rl1Isotype:Full Name:

IgG nuclear receptor subfamily 1, group H,
member 4

Immunogen Catalog Number: member 4
AG21948 Calculated MW: 486 aa, 56 kDa

Observed MW: 48 kDa

Applications

Tested Applications: WB, Indirect ELISA Species Specificity:

human

Background Information

Nuclear Receptor subfamily 1, group H, member 4 (NR1H4, also known as FXR) is a receptor for bile acids and has an important role in regulating energy metabolism in liver, muscle and adipose tissues in humans and animals. NR1H4 is highly expressed in liver and has a role in lipid metabolism, whereas none of the other protein-coding genes in the region has known biological links with cholesterol, further supporting a role for NR1H4 in regulation of cholesterol levels. NR1H4 have four isoforms, i.e., FXRalpha1, FXRalpha2, FXRbeta1, and FXRbeta2, and each isoform has a different expressional level and transcriptional activity depending on its location within specific tissues. (PMID: 14733360, PMID: 30787420)

Storage

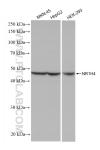

Storage:

Store at -80°C.

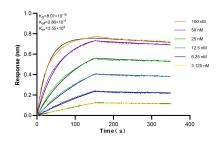

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C $\,$

Storage Buffer PBS Only

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 81820-2-RR (NR1H4 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 81820-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLL) kinetic assays of 81820-2-RR against Human NR1H4 were performed. The affinity constant is 0.807 nM.
