Selected Validation Data

Dot blot analysis was used to confirm the specificity of 82821-6-RR Mono-Methyl-Histone H3 (Lys9) antibody. Peptides were spotted onto NC and probed with antibody at 1 µg/ml. The amount of peptide (ug/mL) spotted is indicated next to each row. This data was developed using the same antibody clone with 82821-6-PBS in a different storage buffer formulation.

Various lysates were subjected to SDS PAGE followed by western blot with 82821-6-RR (Mono-Methyl-Histone H3 (Lys9) antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 82821-6-PBS in a different storage buffer formulation.
