

For Research Use Only

CAMP Recombinant antibody, PBS Only

Catalog Number: 82940-1-PBS

Basic Information

Catalog Number: 82940-1-PBS	GenBank Accession Number: BC055089	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 820	CloneNo.: 230157B4
Source: Rabbit	UNIPROT ID: P49913	
Isotype: IgG	Full Name: cathelicidin antimicrobial peptide	
Immunogen Catalog Number: AG2622	Calculated MW: 170 aa, 19 kDa	
	Observed MW: 18 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
Human, mouse

Background Information

CAMP is a member of an antimicrobial peptide family, characterized by a highly conserved N-terminal signal peptide containing a cathelin domain and a structurally variable cationic antimicrobial peptide, which is produced by extracellular proteolysis from the C-terminus. In addition to its antibacterial, antifungal, and antiviral activities, the encoded protein functions in cell chemotaxis, immune mediator induction, and inflammatory response regulation. CAMP encodes the 18-kDa proprotein hCAP18. FALL-39 and LL-37 are the mature cathelicidin peptides. This antibody can recognize all the proprotein and cleaved species.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

human saliva were subjected to SDS PAGE followed by western blot with 82940-1-RR (CAMP antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 82940-1-PBS in a different storage buffer formulation.

mouse lung tissue were subjected to SDS PAGE followed by western blot with 82940-1-RR (CAMP antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 82940-1-PBS in a different storage buffer formulation.
