

For Research Use Only

Mouse Adiponectin Recombinant antibody, PBS Only (Detector)

Catalog Number:83070-3-PBS

Basic Information

Catalog Number: 83070-3-PBS	GenBank Accession Number: NM_009605	Purification Method: Protein A purification
Size: 1mg/ml	GeneID (NCBI): 11450	CloneNo.: 230258C5
Source: Rabbit	UNIPROT ID: Q60994	
Isotype: IgG	Full Name: adiponectin, C1Q and collagen domain containing	
	Calculated MW: 27kd	

Applications

Tested Applications:
Sandwich ELISA, Indirect ELISA, Sample test

Species Specificity:
mouse

Background Information

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Sandwich ELISA standard curve of MP00039-3, MOUSE Adiponectin Recombinant Matched Antibody Pair - PBS only. 83070-6-PBS was coated to a plate as the capture antibody and incubated with serial dilutions of standard Eg0262. 83070-3-PBS was HRP conjugated as the detection antibody. Range:15.6-1000pg/mL

lungs from one mouse were chopped into 1-2 mm pieces and seeded into approximately 30 mL of media containing RPMI, 10% fetal bovine serum, 50 μ M β -mercaptoethanol, and L-glutamine. The mean Adiponectin concentration was determined to be 4.4 ng/mL in lung cell culture supernatant.

Organs from 2 mice were rinsed with PBS to remove excess blood, chopped into 1-2 mm pieces, homogenized in 5-10 mL of PBS in a tissue homogenizer, and stored at $\leq -80^{\circ}\text{C}$ 5 min. After two freeze-thaw cycles were performed to break the cell membranes, the homogenates were centrifuged for 5 minutes at 5000 x g to remove particulate. The mean Adiponectin concentration was determined to be 130.21 ng/mL in spleen homogenates, 745.9 ng/mL in fat tissue homogenates.

Serum of sixteen mice was measured. The Adiponectin concentration of detected samples was determined to be 7.30 $\mu\text{g/mL}$ with a range of 4.72-13.56 $\mu\text{g/mL}$.
