For Research Use Only

KERA Recombinant antibody

Catalog Number:83272-1-RR

Purification Method:

Protein A purfication

CloneNo.:

230399B11

Basic Information

Catalog Number: 83272-1-RR

Size: 1000 ug/ml

Source:

GenBank Accession Number:

BC032667

GeneID (NCBI):

neID (NCBI):

11081

UNIPROT ID: 060938

Rabbit O60938 Isotype: Full Name:

IgG keratocan
Immunogen Catalog Number: Calculated MW:

AG34171 352 aa, 41 kDa

Applications

Tested Applications: FC (Intra), ELISA

Species Specificity:

human

Background Information

Keratocan and Lumican are the predominant class II SLRPs(Small leucine-rich proteoglycans) in the corneal stroma. While not totally corneal-specific together these SLRPs are excellent biomarkers for the tissue. Mutant mice deficient for keratocan expression have transparent but thin corneal stromas with a mild increase in collagen fibril diameter with no further abnormalities. In humans, mutations in the keratocan gene are associated with a flattened cornea in a rare condition known as cornea plana. The relative specificity of keratocan to corneal keratocytes has been useful for tissue-specific targeting for genetic manipulation of the corneal stroma. (PMID: 32663498)

Storage

Storage:

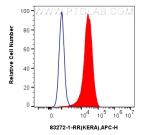

Store at -20°C. Stable for one year after shipment.

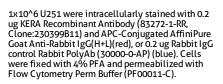

Storage Buffer

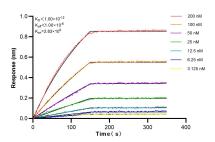

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Biolayer interferometry (BLI) kinetic assays of 83272-1-RR against Human KERA were performed. The affinity constant is below 1 pM.
