

For Research Use Only

FANCD2 Recombinant antibody

Catalog Number: 83946-4-RR

Basic Information

Catalog Number:

83946-4-RR

Size:

1000 µg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG29460

GenBank Accession Number:

NM_001018115

GeneID (NCBI):

2177

UNIPROT ID:

Q9BXW9

Full Name:

Fanconi anemia, complementation

group D2

Calculated MW:

164 kDa

Observed MW:

150-160 kDa

Purification Method:

Protein A purification

CloneNo.:

241048G8

Recommended Dilutions:

WB 1:5000-1:50000

Applications

Tested Applications:

WB, FC (Intra), ELISA

Species Specificity:

human

Positive Controls:

WB : HeLa cells, K-562 cells, MCF-7 cells, Jurkat cells, U2OS cells

Background Information

Amongst the FA genes, Fanconi Anemia Group D2 Protein (FANCD2) is the most evolutionarily conserved gene, demonstrating a high sequence similarity from lower eukaryotes to humans. Upon activation, Fanconi anemia group D2 protein (FANCD2) is monoubiquitinated at K561 and works in cooperation with other FA and non-FA proteins to repair DNA damage. In regards to the FA pathway, monoubiquitinated or activated FANCD2 is often portrayed as the functional representative for the functions of activated FA signaling. (PMID: 28825622)

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83946-4-RR (FANCD2 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.

1×10^6 HeLa cells were intracellularly stained with 0.25 μ g FANCD2 Recombinant antibody (83946-4-RR, Clone:241048G8) and APC-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L)(red), or 0.25 μ g Isotype Control (blue). Cells were fixed and permeabilized with True-Nuclear Transcription Factor Buffer Set.

Biacore kinetic assays of 83946-4-RR against Human FANCD2 were performed. The affinity constant is below 1 pM.
