

For Research Use Only

GCNA Recombinant antibody, PBS Only

Catalog Number: 84124-4-PBS

Basic Information

Catalog Number: 84124-4-PBS	GenBank Accession Number: BC136259	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 93953	CloneNo.: 241428A9
Source: Rabbit	UNIPROT ID: Q96QF7	
Isotype: IgG	Full Name: acidic repeat containing	
Immunogen Catalog Number: AG21895	Calculated MW: 691 aa, 76 kDa	
	Observed MW: 90 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

GCNA, also known as ACRC, belongs to the serine-aspartate repeat-containing protein (SDr) family. GCNA has remained tightly associated with sexual reproduction showing enriched expression within germ cells in both invertebrate and vertebrate species. GCNA has recently been implicated in resolving DPCs in germ cells and early embryos. GCNA is targeted to SUMOylated DPC proteins through its SUMO-interacting motifs (SIMs), reinforcing the importance of SUMOylation in DPC repair. The amino acid sequence homology of GCNA in humans and mice is very low. The calculated molecular weight of GCNA is 76 kDa. Sometimes higher molecular weight around 90 kDa can also be observed, which may be caused by SUMO modification (PMID: 31839537, 32329115).

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 84124-4-RR (GCNA antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84124-4-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed LNCaP cells using GCNA antibody (84124-4-RR, Clone: 241428A9) at dilution of 1:400 and CoraLite@488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-Phalloidin (red). This data was developed using the same antibody clone with 84124-4-PBS in a different storage buffer formulation.

Biacore interferometry (BLI) kinetic assays of 84124-4-RR against Human GCNA were performed. The affinity constant is below 1 pM.
