For Research Use Only

IGFBP6 Recombinant antibody

Catalog Number:84364-5-RR

Purification Method:

Protein A purfication

Recommended Dilutions:

WB 1:1000-1:8000

CloneNo.:

241724H5

Basic Information

Catalog Number:

84364-5-RR

Size: 1000 µg/ml

Source:

Rabbit Isotype:

Full Name:

25 kDa Observed MW:

34 kDa

Applications

Tested Applications:

WB, ELISA

Species Specificity:

human

GenBank Accession Number:

BC011708 GeneID (NCBI):

3489

UNIPROT ID: P24592

insulin-like growth factor binding protein 6

Calculated MW:

WB: human testis tissue,

Positive Controls:

Background Information

Insulin-like growth factor (IGF) binding protein (IGFBP6), a 240 amino acid protein, contains an IGFBP N-terminal domain and a thyroglobulin type-1 domain. It modulates the activity of IGF and shows independent effects of IGF, such as growth inhibition and apoptosis. It can decrease the proliferation and survival of cancer cells such as lung cancer cells and naso-pharyngeal cancer cells. IGFBP-6 is distinctive for its 50-fold higher binding affinity for IGF-II over IGF-I and this specificity makes it an attractive potential therapeutic candidate for IGF-II-dependent pediatric malignancies such as rhabdomyosarcoma (RMS). In addition, it was found that IGFBP6 can promote the migration of RMS cells in an IGF-independent manner, and MAPK pathways were involved in this process. Further study reported that IGFBP6 is one of most highly expressed proteins in varicose vein tissues and is involved in the proliferation of vascular smooth muscle cells (VSMCs), which may provide insights into the underlying pathogenesis of varicose vein.

Storage

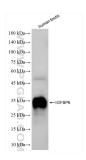

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

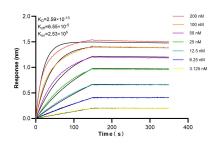

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

human testis tissue were subjected to SDS PAGE followed by western blot with 84364-5-RR (IGFBP6 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.

Biolayer interferometry (BLL) kinetic assays of 84364-5-RR against Human I GFBP6 were performed. The affinity constant is 0.259 nM.
