

For Research Use Only

Tyrosinase Recombinant antibody, PBS Only

Catalog Number: 84723-3-PBS

Basic Information

Catalog Number: 84723-3-PBS	GenBank Accession Number: BC027179	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 7299	CloneNo.: 242174D2
Source: Rabbit	UNIPROT ID: P14679	
Isotype: IgG	Full Name: tyrosinase (oculocutaneous albinism IA)	
Immunogen Catalog Number: AG34940	Calculated MW: 529 aa, 60 kDa	
	Observed MW: 80 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

Tyrosinase is a copper-containing oxidase that functions in the formation of pigments such as melanins and other polyphenolic compounds. It's a melanocyte-specific enzyme critical for the synthesis of melanin, a process normally restricted to a post-Golgi compartment termed the melanosome. Loss-of-function mutations in tyrosinase are the cause of oculocutaneous albinism. The 60-kDa tyrosinase core polypeptide is modified in the endoplasmic reticulum (ER) by cotranslational addition of multiple N-linked glycans, producing the 70-kDa species. Complex sugar modifications in the Golgi apparatus further increases tyrosinase's molecular mass to 80 kDa, the size of the mature wild-type (WT) isoform. (PMID:10823941)

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 84723-3-RR (Tyrosinase antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84723-3-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 84723-3-RR against Human Tyrosinase were performed. The affinity constant is below 1 pM.
