

For Research Use Only

Phospho-NTRK1 (Tyr496) Recombinant antibody, PBS Only

Catalog Number: 84976-1-PBS

Basic Information

Catalog Number: 84976-1-PBS	GenBank Accession Number: BC062580	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): 4914	CloneNo.: 241917B1
Source: Rabbit	UNIPROT ID: P04629	
Isotype: IgG	Full Name: neurotrophic tyrosine kinase, receptor, type 1	
	Observed MW: 140 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

The tyrosine kinase receptor TrkA (or neurotrophin receptor kinase 1, NTRK1) has been predominately studied for its role during the development of the nervous system. In developing neurons, TrkA activation upon binding of its ligands nerve growth factor (NGF) or neurotrophin-3 (NT-3) results in the stimulation of various tyrosine kinase-induced signaling pathways leading to neuronal outgrowth. (PMID: 32957504) This antibody recognizes the phosphorylation of TrkA at site 496, which is the phosphorylation of the isoform 2 sequence at site 490.

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Non-treated and pervanadate treated HeLa cells were subjected to SDS PAGE followed by western blot with 84976-1-RR (Phospho-NTRK1 (Tyr496) antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. The membrane was stripped and re-blotted with Vinculin (66305-1-Ig) antibody as a loading control. This data was developed using the same antibody clone with 84976-1-PBS in a different storage buffer formulation.
