For Research Use Only

Anti-Human CD6 Rabbit Recombinant Antibody

Catalog Number:98223-1-RR

Basic Information

Catalog Number:

GenBank Accession Number: BC033755

mber: Purification Method:

98223-1-RR Size:

Rabbit

GeneID (NCBI):

Protein A purfication

Jize.

027

CloneNo.: 241965C9

100ug, 1000 μ g/ml Source:

UNIPROT ID: P30203

Isotype:

Full Name: CD6 molecule

IgG

Applications

Tested Applications:

FC

Species Specificity:

human

Background Information

CD6 is a type I transmembrane glycoprotein that belongs to the scavenger receptor cysteine-rich superfamily (PMID: 21880988). It is composed of an extracellular region, which consists of three tandem SRCR domains, a transmembrane region, and a cytoplasmic tail devoid of intrinsic catalytic activity but harboring several phosphorylatable residues suitable for intracellular signal transduction (PMID: 38139340; 23711376). CD6 is expressed by T cells, medullary thymocytes, a subset of B cells and NK cells, and in some cells of the brain (PMID: 1919444; 21178331). CD6 plays a role in lymphocyte activation, proliferation, and survival processes via interaction with its endogenous ligands.

Storage

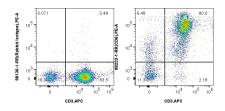

Storage:

Store at 2 - 8°C. Stable for one year after shipment.

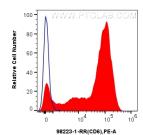

Storage Buffer:

PBS with 0.09% sodium azide, pH 7.3.

Selected Validation Data

1x10^6 human PBMCs were surface stained with 0.25 ug Anti-Human CD6 Rabbit Recombinant Antibody (98223-1-RR, Clone: 241965C9) or Rabbit IgG Isotype Control Recombinant Antibody (98136-1-RR, Clone: 240953C9), and PE-Conjugated Goat Anti-Rabbit IgG(H+L). Cells were co-stained with APC Anti-Human CD3 (OKT3) Mouse IgG2a Recombinant Antibody (APC-65569, Clone: OKT3). Cells were not fixed.

1x10^6 human PBMCs were surface stained with 0.25 ug Anti-Human CD6 Rabbit Recombinant Antibody (98223-1-RR, Clone: 241965C9) (red) or Rabbit IgG Isotype Control Recombinant Antibody (98136-1-RR, Clone: 240953C9) (blue), and PEConjugated Goat Anti-Rabbit IgG(H+L). Cells were not fixed.
