For Research Use Only

APC Anti-Human CD206 (15-2)

Catalog Number: APC-65155 2 Publications

Basic Information

Catalog Number:

APC-65155

Size:

100tests, 10 μ l/test

Source: Mouse Isotype:

IgG1, kappa

mannose receptor, C type 1

GenBank Accession Number:

Calculated MW:

NM 002438

UNIPROT ID:

Full Name:

4360

P22897

GeneID (NCBI):

166 kDa

Purification Method:

The purified antibody is conjugated with allophycocyanin (APC) under optimum conditions. The conjugate is purified by size-exclusion

chromatography.

CloneNo.: 15-2

Excitation/Emission maxima wavelengths:

650 nm / 660 nm

Applications

Tested Applications:

Cited Applications:

FC

Species Specificity:

Human

Cited Species:

human

Background Information

CD206, also named as MMR, CLEC13D and MRC1, is a type I membrane receptor that mediates the endocytosis of glycoproteins by macrophages. CD206 has been shown to bind high-mannose structures on the surface of potentially pathogenic viruses, bacteria, and fungi so that they can be neutralized by phagocytic engulfment. CD206 is a 170 $k Da\ transmembrane\ protein\ which\ contains\ 5\ domains: an\ amino-terminal\ cysteine-rich\ region, a\ fibronectin\ type\ II$ repeat, a series of eight tandem lectin-like carbohydrate recognition domains (responsible for the recognition of mannose and fucose), a transmembrane domain, and an intracellular carboxy-terminal tail. It is expressed on most tissue macrophages, in vitro derived dendritic cells, lymphatic and sinusoidal endothelia.

Notable Publications

Author	Pubmed ID	Journal	Application
Quan Yan	38602536	Cell Mol Life Sci	FC
Xinyi Qu	37445610	Int J Mol Sci	FC

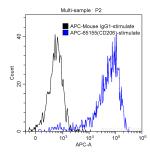

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.1% sodium azide.

Selected Validation Data

Human monocyte-derived dendritic cells (monocytes stimulated with GM-CSF and IL-4) were surface stained with 10 ul APC Anti-Human CD206 (APC-65155, Clone:15-2) (blue) or APC-Mouse IgG1 isotype control (black). Cells were not fixed.
