For Research Use Only

CoraLite® Plus 405 Anti-Human CD41a (HIP8)

www.ptglab.com

Catalog Number: CL405-65173

Basic Information

Catalog Number:

CL405-65173

100tests, 5 ul/test

Source:

Mouse Isotype:

IgG1, kappa

glycoprotein IIb of IIb/IIIa complex,

antigen CD41)

BC117443

3674

P08514

GeneID (NCBI):

UNIPROT ID:

Full Name:

GenBank Accession Number:

integrin, alpha 2b (platelet

Purification Method:

Unknow CloneNo.:

HIP8

Excitation/Emission maxima

wavelengths: 399 nm / 422 nm

Applications

Tested Applications:

Species Specificity:

human, non-human primates

Background Information

The integrins are a superfamily of cell adhesion receptors that bind to extracellular matrix ligands, cell-surface ligands, and soluble ligands (PMID: 17543136). They are transmembrane $\alpha \beta$ heterodimers and at least 24 distinct integrin heterodimers are formed by the combination of 18 $\,^{\circ}$ and eight $\,^{\circ}$ known subunits (PMID: 17543136; 20029421). In addition to mediating cell adhesion, integrins also play important roles in modulating signal transduction pathways that control cellular responses including migration, proliferation, differentiation, and apoptosis (PMID:19118207). Integrin alpha-IIb (ITGA2B, CD41) is expressed on platelets, megakaryocytes and some hematopoietic progenitor cells (PMID: 11934866).

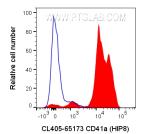

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

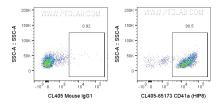

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA.

Selected Validation Data

100 ul human platelet-rich plasma (diluted 1:2 with PBS) was surface stained with 5 ul Coralite® Plus 405 Anti-Human CD41a (CL405-65173, Clone:HIP8) or Coralite® Plus 405 Mouse IgG1 Isotype Control (CL405-65124). Cells were not fixed.

100 ul human platelet-rich plasma (diluted 1:2 with PBS) was surface stained with 5 ul Coralite® Plus 405 Anti-Human CD41a (CL405-65173, Clone:HIP8) or Coralite® Plus 405 Mouse IgG1 Isotype Control (CL405-65124). Cells were not fixed.
