For Research Use Only

CoraLite® Plus 488-conjugated Stathmin 1 Recombinant antibody

1000 µg/ml

Catalog Number: CL488-82559

Basic Information

Catalog Number:

CL488-82559 BC014353 GeneID (NCBI):

UNIPROT ID: Source: Rabbit P16949 Full Name: Isotype:

stathmin 1/oncoprotein 18

Calculated MW: Immunogen Catalog Number:

AG1633 18 kDa

Observed MW: 18 kDa

3925

GenBank Accession Number:

Purification Method:

Protein A purification

CloneNo.:

Recommended Dilutions:

IF 1:200-1:800

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

Applications

Tested Applications:

IF/ICC

Species Specificity: Human, rat

Positive Controls:

IF: HeLa cells,

Background Information

 $Stathmin \ \textbf{1} \ (STMN1) \ normally \ regulates \ microtubule \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \ by \ sequestering \ free \ tubulin \ heterodimers \ or \ dynamics \ either \$ by promoting microtubule catastrophe. STMN1 is highly expressed in fetal and adult brain, spinal cord, and cerebellum. Many different phosphorylated forms are observed depending on specific combinations among the sites which can be phosphorylated. Phosphorylation of stathmin is involved in response to NGF, neuron polarization and microtubule polymerization inhibition activity. Increased expression of STMN1 has been observed in a variety of human malignancies, such as colorectal primary tumors and metastatic tissues, but its association with melanoma is so far not well known.

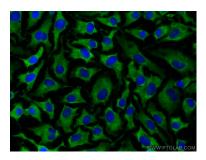

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

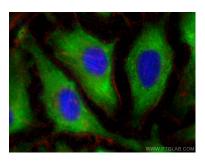

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using CoraLite® Plus 488 Stathmin 1 antibody (CL488-82559, Clone: 2H6) at dilution of 1:400.

Immunofluorescent analysis of (-20°C Ethanol) fixed Hela cells using CoraLite® Plus 488 Stathmin 1 antibody (CL488-82559, Clone: 2H6) at dilution of 1:400, CL594-phalloidin (red).
