For Research Use Only

CoraLite® Plus 488-conjugated CD141/Thrombomodulin Recombinant antibody

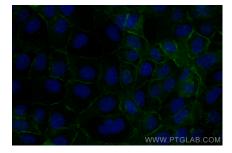

Catalog Number:CL488-83416-4

Basic Information	Catalog Number: CL488-83416-4	GenBank Accession Number: NM_000361.3	Purification Method: Protein A purification
	Size: 1000 µg/ml	GenelD (NCBI): 7056	CloneNo.: 240365D1
	Source: Rabbit	UNIPROT ID: P07204	Recommended Dilutions: IF/ICC 1:50-1:500
	Isotype: IgG	Full Name: thrombomodulin Calculated MW: 60 kDa	Excitation/Emission maxima wavelengths: 493 nm / 522 nm
		Applications	Tested Applications: IF/ICC
Species Specificity: human	IF/ICC : P		1431 CEUS,
Background Information	Thrombomodulin, also known as CD141, is an endothelial cell surface glycoprotein that forms a 1:1 complex with the coagulation factor thrombin and plays an important role as a natural anticoagulant. Thrombomodulin serves to convert thrombin from a procoagulant protein into the activator for protein C. Once converted to activated protein C (APC), this protein serves as a major anticoagulant in blood (PMID: 2827310). Thrombomodulin is also located in other cells (keratinocytes, osteoblasts, macrophages) where it might be involved in cell differentiation or in inflammation (PMID: 9814688). In humans, thrombomodulin is encoded by the THBD gene. Mutations in this gene are a cause of thromboembolic disease, also known as inherited thrombophilia. Thrombomodulin is glycosylated and has an apparent molecular weight of 75 to 110 kDa (PMID: 1650405; 2827310).		
Storage	Storage: Store at -20°C. Avoid exposure Storage Buffer: PBS with 50% Glycerol, 0.05% Aliquoting is unnecessary for -2	•	ent.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed A431 cells using Coralite® Plus 488 CD141/Thrombomodulin antibody (CL488-83416-4, Clone: 240365D1) at dilution of 1:100.
