For Research Use Only

CoraLite® Plus 488-conjugated PRKCA Recombinant antibody

Catalog Number: CL488-83840-6

Basic Information

Catalog Number:

GenBank Accession Number: BC 109274 Purification Method: Protein A purification

CL488-83840-6

GeneID (NCBI):

otein A purification

1000 μg/ml

Gener (NCBI): 5578

CloneNo.: 240926E1

Source: Rabbit

UNIPROT ID: P17252 Recommended Dilutions:

Isotype:

Full Name:

IF/ICC 1:50-1:500

IgG

protein kinase C, alpha

Excitation/Emission maxima wavelengths:

Immunogen Catalog Number:

Observed MW:

wavelengths: 493 nm / 522 nm

AG1025

77 kDa

IVV.

Applications

Tested Applications:

Positive Controls: IF/ICC : HeLa cells,

Species Specificity:

human

IF/ICC

Background Information

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. PRKCA is one of the PKC family members. This kinase has been reported to play roles in many different cellular processes, such as cell adhesion, cell transformation, cell cycle checkpoint, and cell volume control. Knockout studies in mice suggest that this kinase may be a fundamental regulator of cardiac contractility and Ca(2+) handling in myocytes.

Storage

Storage

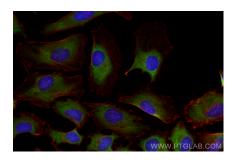

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using CoraLite® Plus 488 PRKCA antibody (CL488-83840-6, Clone: 240926E1) at dilution of 1:200.
