For Research Use Only

CoraLite® Plus 647-conjugated PKC Beta Polyclonal antibody

Catalog Number: CL647-12919

Basic Information

Catalog Number:

CL647-12919

1000 µ g/ml
Source:
Rabbit
Isotype:

Immunogen Catalog Number:

Immunogen Catatog Number: AG3501

3591 673 aa, 77 kDa

Observed MW: 77 kDa

BC036472

GeneID (NCBI):

UNIPROT ID:

protein kinase C, beta Calculated MW:

P05771 Full Name:

GenBank Accession Number:

Purification Method:

Antigen affinity purification

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

Applications

Tested Applications:

FC (Intra)

Species Specificity:

human, mouse, rat

Background Information

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. Protein kinase Cs (PKCs) are signaling molecules that play key roles in many cellular processes, including secretion, gene expression, proliferation, and muscle contraction. The PKC family is broadly divided into three subgroups: classical, novel, and atypical PKCs. These subgroups differ in both protein sequences and mechanistic requirements for catalytic activity. PKC beta is one of the PKC family members. PKC beta has been reported to be involved in many different cellular functions, such as B cell activation, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption. Studies in mice also suggest that this kinase may also regulate neuronal functions and correlate fear-induced conflict behavior after stress. This antibody can recognize PKC beta, PKC alpha, PKC gamma, PKC epsilon and PKC delta.

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data
