For Research Use Only

CoraLite® Plus 647 Anti-Mouse CD48 (HM48-1)

Catalog Number: CL647-65227

Basic Information

Catalog Number:

CL647-65227

Size:

100ug, 0.5 mg/ml Source:

Armenian Hamster

Isotype:

Purification Method:

Protein A purification

CloneNo.: HM48-1

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

Applications

Tested Applications:

Species Specificity:

mouse

Background Information

Signaling lymphocytic activation molecule family 2 (SLAMF2, CD48) is an adhesion and costimulatory molecule expressed constitutively on most hematopoietic cells, particularly in antigen-presenting cells (APC). CD48 is expressed on all the hematopoietic cells, both in humans and mice, except for murine neutrophils and long-term HSC. CD48 exists as both a membrane-bound (mCD48) and a soluble (sCD48) form. CD48 can activate T cells, antigen-presenting cells and granulocytes, by binding to CD2 or bacterial FimH, and through cell intrinsic effects. Interactions between CD48 and its high-affinity ligand CD244 are more complex, with both stimulatory and inhibitory outcomes. CD48 expression is increased in autoimmunity and allergy diseases, and anti-CD48 monoclonal antibodies have been shown to attenuate experimental autoimmune encephalomyelitis.

GenBank Accession Number:

BC060977

12506

P18181

GeneID (NCBI):

UNIPROT ID:

Full Name:

CD48 antigen

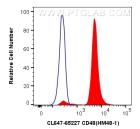

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.1% sodium azide and 0.5% BSA, pH 7.3.

Selected Validation Data

1X10^6 mouse splenocytes were surface stained with 1 ug CoraLite® Plus 647 Anti-Mouse CD48 (CL647-65227, Clone: HM48-1) (red), or 1 ug Control Antibody. Cells were not fixed.
