

For Research Use Only

CD81 Protein, Human, Recombinant

www.ptgcn.com

Catalog Number: CM14673

产品信息

Catalog Number:
CM14673

分子量:
Approxiamtely 9.9 kDa

CAS No:

CAS号:
分子式:
主要靶点:

描述

CD81, also known as TAPA-1, belongs to the transmembrane 4 superfamily, also known as the tetraspanin family. Members of this family mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. CD81 is a widely expressed cell-surface protein involved in an astonishing variety of biologic responses. It is related to adhesion, morphology, activation, proliferation, and differentiation of B, T, and other cells. On B cells CD81 is part of a complex with CD21, CD19, and Leu13. This complex reduces the threshold for B cell activation via the B cell receptor by bridging Ag specific recognition and CD21-mediated complement recognition.
