

Catalog Number: CM16896

产品信息

Catalog Number:
CM16896

CAS号:
2197112-39-1

分子式:

主要靶点:
CD38

主要通路:
免疫与炎症

Felzartamab

体外活性

MOR202-mediated toxic effects on multiple myeloma (MM) cell lines can be enhanced by the proteasome inhibitor bortezomib (BOR) and the immunomodulator lenalidomide (LEN).[1]

体内活性

MOR202 (12 mg/kg; murine MM models) dose-dependently reduced osteolysis by up to 55%. Coadministration with 0.6 mg/kg BOR or 50 mg/kg LEN completely eliminated osteolysis at a low dose of 3 mg/kg.[1]

描述

Felzartamab(MOR-202) is a human-targeted monoclonal antibody to CD38 for the study of multiple myeloma and advanced antibody-mediated rejection of allogeneic kidney transplants.
