## For Research Use Only Recombinant Mouse Apolipoprotein E/APOE3 protein (His Tag)

## Catalog Number: Eg1093

Basic Information	Species: Mouse	Purity: >90 %, SDS-PAGE	Tag: C-6*HIS
Technical Specifications	Purity: >90 %. SDS-PAGE		
	Endotoxin Level: <0.1 EU/ µg protein, L/	AL method	
	Source: HEK293-derived Mouse Apolipoprotein E protein Glu19-Gln311 (Accession# P08226) with a His tag at the C- terminus.		
	GenelD: 11816		
	Accession: P08226		
	Predicted Molecular M 34.8 kDa	lass:	
	SDS-PAGE: 30-32 kDa, reducing (R	R) conditions	
	Formulation: Lyophilized from 0.22 protectants before lyo	µ m filtered solution in PBS, pH 7.4. Normally philization.	5% trehalose and 5% mannitol are added as
<b>Biological Activity</b>	Not tested		
Storage and Shipping	Storage: It is recommended that	at the protein be aliquoted for optimal storage	e. Avoid repeated freeze-thaw cycles.
	<ul> <li>Until expiry d</li> <li>3 months, -20</li> </ul>	ate, -20 $^\circ\!$	onstitution.
	Shipping: The product is shipped temperature.	d at ambient temperature. Upon receipt, store	it immediately at the recommended
Reconstitution	Briefly centrifuge the	tube before opening. Reconstitute at 0.1-0.5	mg/mL in sterile water.
Background	Apolipoprotein E (APOE) was first identified in the 1970s as one of the protein components of plasma very- low-density lipoprotein (VLDL) and found to play a critical role in plasma cholesterol metabolism. APOE is a 299-amino acid polypeptide that mediates the binding, internalization, and catabolism of lipoprotein particles, and also serves as a ligand for the LDL (apo B/E) receptor and for the specific apo-E receptor (chylomicron remnant) of hepatic tissues. The very strong association of the APOE 4 allele with AD risk and its role in the accumulation of amyloid $\beta$ in brains of people and animal models solidify the biological relevance of APOE isoforms but do not provide mechanistic insight.

Synonyms	Apoe,Al255918,apolip	oprotein E	

## Selected Validation Data

Purity of Recombinant Mouse Apolipoprotein E was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.
