For Research Use Only

## FITC Anti-Human CD106 (1.G11B1)

Catalog Number:FITC-65049 1 Publications

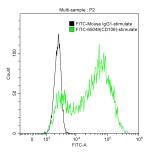

Basic Information	Catalog Number: GenBank Accession Number: FITC-65049 BC017276		ccession Number:	Purification Method: Affinity purification
	Size:     GeneID (NCBI):       100tests, 10 µl/test     7412		CloneNo.: 1.G11B1	
	Source: Mouse	Source: UNIPROT ID:   Mouse P19320   Isotype: Full Name:		Excitation/Emission maxima wavelengths: 498 nm / 526 nm
	lsotype: IgG1, kappa			
		Calculated 739 aa, 81 k		
Applications	Tested Applications: FC			
	Cited Applications: FC			
	Species Specificity: Human			
	Cited Species: human			
Background Information	Vascular cell adhesion molecule 1 (VCAM1), also known as CD106, is a 110-kDa transmembrane glycoprotein belonging to the immunoglobulin gene superfamily. VCAM1 is expressed by cytokine-activated endothelium, interacts with integrin VLA4 ( $\alpha$ 4 $\beta$ 1) present on the surface of leukocytes, and mediates both adhesion and signal transduction. It is also expressed either constitutively or inducibly in a variety of other cell types, including vascular smooth muscle cells, differentiating skeletal muscle cells, renal and neural epithelial cells, macrophages (Kupffer cells), dendritic cells, and bone marrow stromal cells (PMID: 7507076, 11359843).			
Notable Publications	Author	Pubmed ID	Journal	Application

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

1X10^6 TNF-alpha treated HUVEC cells were surface stained with 10 ul FITC Anti-Human CD106 (FITC-65049, Clone: 1.G11B1) (green) or FITC-Mouse IgG1 isotype control (black). Cells were not fixed.
