For Research Use Only

PE Anti-Human CD41a (HIP8)

Catalog Number: PE-65173

Purification Method:

Excitation/Emission maxima

496 nm, 565 nm / 578 nm

Unknow

HIP8

CloneNo.:

wavelengths:

Basic Information

Catalog Number:

PE-65173 BC117443 GeneID (NCBI): 100tests, 5 ul/test 3674

UNIPROT ID: Source: Mouse P08514

Full Name: Isotype: IgG1, kappa

integrin, alpha 2b (platelet glycoprotein IIb of IIb/IIIa complex,

GenBank Accession Number:

antigen CD41)

Applications

Tested Applications:

FC

Size:

Species Specificity:

human, non-human primates

Background Information

The integrins are a superfamily of cell adhesion receptors that bind to extracellular matrix ligands, cell-surface ligands, and soluble ligands (PMID: 17543136). They are transmembrane $\alpha \beta$ heterodimers and at least 24 distinct integrin heterodimers are formed by the combination of 18 $\,^{\circ}$ and eight $\,^{\circ}$ known subunits (PMID: 17543136; 20029421). In addition to mediating cell adhesion, integrins also play important roles in modulating signal transduction pathways that control cellular responses including migration, proliferation, differentiation, and apoptosis (PMID:19118207). Integrin alpha-IIb (ITGA2B, CD41) is expressed on platelets, megakaryocytes and some hematopoietic progenitor cells (PMID: 11934866).

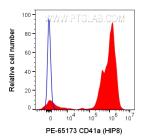

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

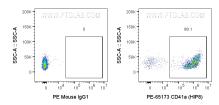

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA.

Selected Validation Data

100 ul human platelet-rich plasma (diluted 1:2 with PBS) was surface stained with 5 ul PE Anti-Human CD41a (PE-65173, Clone:HIP8) or PE Mouse IgG1 Isotype Control (PE-65124). Cells were not fixed.

100 ul human platelet-rich plasma (diluted 1:2 with PBS) was surface stained with 5 ul PE Anti-Human CD41a (PE-65173, Clone:HIP8) or PE Mouse IgG1 Isotype Control (PE-65124). Cells were not fixed.
