

For Research Use Only

PE-conjugated Phospho-CREB1 (Ser133) Recombinant antibody

Catalog Number: PE-81871

Basic Information

Catalog Number: PE-81871	GenBank Accession Number: BC010636	Purification Method: Protein A purification
Size: 200 µg/ml	GeneID (NCBI): 1385	CloneNo.: 5H5
Source: Rabbit	UNIPROT ID: P16220	Excitation/Emission maxima wavelengths: 496 nm, 565 nm / 578 nm
Isotype: IgG	Full Name: cAMP responsive element binding protein 1	
	Calculated MW: 341 aa, 35 kDa	
	Observed MW: 35-46 kDa	

Applications

Tested Applications:
FC (Intra)

Species Specificity:
Human

Background Information

The cAMP-response element binding protein (CREB) is localized in the nucleus and acts as a transcription factor, which binds to the cAMP response element (CRE) of the promoters of its target genes, upon phosphorylation at Ser133 by different receptor-activated protein kinases, such as protein kinase A (PKA), calmodulin-dependent protein kinase (CaMK), mitogen-activated protein kinases (MAPK), and other kinases. The activity of CREB1 in neurons has been correlated with various intracellular processes, including proliferation, differentiation, survival, long-term synaptic potentiation, neurogenesis, and neuronal plasticity. CREB1 belongs to the CREB/activating transcription factor (ATF) family of transcription factors. The antibody also detects the phosphorylated form of the CREB-related protein ATF1. (PMID: 30214393, PMID: 33917483, PMID: 32605164)

Storage

Storage:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:
PBS with 0.09% sodium azide and 0.5% BSA.
